THE LANCET · OCTOBER 2026

A chatbot met real patients. A doctor watched every chat.

A real-world test of AI history-taking in primary care, and what it doesn't show.

Viktor Simunović, MD

SAFETY

0 stops

in 98 completed AI conversations

Supervising doctors noted **1** hallucination and added clinical information in **5** chats.

FOR THE GP

33/44

GPs who read the AI summary said it helped them prepare

In 25 of 44 they said it might have changed what they did.

THE CATCH

The safety net was a doctor watching live

One centre in Boston. 98 patients. English speakers with a single urgent complaint. Funded by Alphabet. No health outcomes measured.

YOUR TURN

Would you let a chatbot take your history before your GP visit?

Yes or no in the comments.
